

Accelerate Strategic Growth

Control Buyouts Across the Services Economy

Longshore Capital Partners is a leading private equity fund that invests alongside founders and management teams in businesses with durable value propositions in growing end-markets. Our thematic investment process is targeted toward specific subsectors within the broader services landscape. During our ownership, we use a collaborative approach to execute a shared value creation plan with our management teams. Each tailored value creation plan strategically positions each platform as an attractive asset for future buyers and is anchored by the following tenets: revenue growth, acquisition program strategy, management talent expansion, and productivity and infrastructure enhancement.

Investment Criteria

Size / Geography

Platform companies have \$5 million to \$15 million of EBITDA and are based in North America

Investment Objectives

Typically partner with current ownership or management to purchase 51% to 100% of a business

Durable Business Models

Our portfolio companies are resilient through economic cycles

Recurring Revenue

We invest in growing companies with high levels of revenue visibility through contractual, recurring, or reoccurring revenue streams

Secular Tailwinds

We partner with businesses that are benefiting from long term economic trends

Technology Enablement

We target businesses that will benefit from our prioritization of the enhancement of technology during our hold period
